## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. This action is in response to Applicant's application, filed on February 05, 2002 have been considered but are deemed moot because of Restrictions Request below.

#### ***Election/Restrictions***

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143). Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a method for processing of information system between a server and database in network, which is processing of data in database, classified in class 707, subclass 200.
- II. Claims 14-18 and 26-29, drawn to a system and apparatus for a server configured with a database enabled for storing and retrieving a user interface, and uploading user input, which is generating database or data structure, classified in class 707, subclass 102.
- III. Claims 19-25, drawn to a method for entering data into data template, uploading the template into database and providing data to business management, which is database accessing, classified in class 707, subclass 1.

- IV. Claims 30-38, drawn to a apparatus for providing an interface to a user, configuring the interface to a data template, and entering business metrics data in the data template, which is manipulating data structure, classified in class 707, subclass 101.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I can be used for processing of information system between a server and database in network, which is processing of data in database. Invention II can be used for a server configured with a database enabled for storing and retrieving a user interface, and uploading user input, which is generating database or data structure. Invention III can be used for entering data into data template, uploading the template into database and providing data to business management, which is database accessing. Invention IV can be used for providing an interface to a user, configuring the interface to a data template, entering business metrics data in the data template, which is manipulating data structure. See MPEP 806.05(d).

4. Because these inventions are distinct for reasons given above and have acquired separate status in the art as shown their different classification, restriction for examination purpose as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, Group III and Group IV each other, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicants is reminded that upon the cancellation of claims to be non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).
